<<interface>>

Carnivoro

Coleira

-tamanho:int

+setTamanho()

Diagram illustrating a refactoring operation in KDMRefactoring.xml. The diagram shows a class hierarchy and associations. A class named `-portaMala:PortaMala` is associated with `PessoaAbstract` (containing `-carro:Carro`) and `Animal` (containing `-end:Endereco` and `-name:String`). The `Animal` class is associated with `Coleira` (containing `-tamanho:int` and `+setTamanho()`). The `Animal` class is also associated with `<<interface>> Carnivoro`. The diagram is labeled with a circled 'B'.
